

# How to Setup

## Where to set up country code/ region code in Ecsow Auto Dialer?

Please set it from the 'General' tab under Ecsow Skype Dialer Options. (e.g.: U.S. country code is 1, you need to specify +1 for a U.S. phone number if you use the Skype as the phone service provider. **If you use the SIP(VoIP) service, you need to specify 1 for a U.S. phone number**)

The screenshot shows the 'Options' dialog box for the Ecsow Skype Dialer, with the 'General' tab selected. The 'Choose the phone service (VoIP service Provider)' section has two radio buttons: 'The SIP (VoIP) Service' and 'The desktop of Skype'. The 'The desktop of Skype' option is selected. Below this, the 'Specify the phone number Country/Region code' section is highlighted with an orange box. It contains a text input field for 'Country/Region code' with the value '+1' and a hint 'For example: +1 for USA'. Below this, there are three more input fields: 'Wait for answer (seconds):' with the value '45', 'Maximum attempts:' with the value '0', and 'Pause seconds between calls:' with the value '10'. The 'OK' and 'Cancel' buttons are at the bottom right.

General SIP Account Do-Not-Call File Voice Activity Detection Prese

Choose the phone service (VoIP service Provider)

☐ The SIP (VoIP) Service  
It's cheap with great audio quality. There are many VoIP service providers, such as SkypeConnect, CallCentric, etc.

☒ The desktop of Skype  
It's easy to setup and the audio quality is excellent. You can use the Skype credit to make phone calls.

Specify the phone number Country/Region code

Country/Region code: +1 For example: +1 for USA

Specify the number of seconds to wait for an answer

Wait for answer (seconds): 45

If the call is not answered it can be postponed

Maximum attempts: 0

Specify a pause time between calls

Pause seconds between calls: 10

OK Cancel
