

# How to Setup

## How to specify the corresponding relation when I import the CSV file?

Please specify the column index when you import the CSV file as below. You can click the index of column header to specify the phone number column. The other fields should manually input the index of the column to specify the corresponding relation.

The screenshot shows the 'Import Contacts' dialog box with the following configuration:

- Phone number column (click the column header to select it):** 2
- ☒ **Specify the corresponding relation between fields and the index of the column** [? How to config it?](#)
- Field Mapping:**
  - First name: 0
