

Use SIP Trunk / VoIP Phone Service

How to config Anveo for Ecsow Dialer/Voice Broadcast

Find your Anveo credentials: To do so, log into your Anveo account, hover over the 'My Account' menu, and click 'Account Preferences', and on the left click on 'SIP Device Registration'. Please see the below image.

The screenshot displays the Anveo account management interface. On the left, the 'My Account' menu is open, with 'Account Preferences' highlighted. Below it, the 'SIP Device Registration' option is selected. The main content area shows 'Sip Registration Details' with the following information:

- Username: 7434419333
- Password: cbsu-*
- SIP Proxy Servers: sip.anveo.com (USA), sip.ca.anveo.com (CANADA), sip.de.anveo.com (GERMANY), sip.ap.anveo.com (HONG KONG). DNS_SRV is supported. Proxy port: 5010 (only use if your SIP device does not support DNS_SRV).
- Audio codecs supported: All Subscription Plans: G.711 ulaw (PCMu), GSM. Premium Plans (Starter and up): G.722, G.729.
- Protocol: UDP, TCP (only available on premium subscription plans: Starter and up).
- SIP URI: 15557434419333@sip.anveo.com:5010

Additional information which might be helpful

On the right, the 'Options' dialog box is open, showing configuration for the SIP account. The 'SIP Account' tab is active, displaying the following fields:

- Display Name: sip.anveo.com
- SIP ID/User Name: 7434419333
- Domain: sip.anveo.com
- Authorization User: 7434419333
- Password: [Redacted]

Outbound Proxy: Send outbound calls via: Proxy (sip.anveo.com:5010)

Concurrent Calls: Number of concurrent calls: 1

Copy and paste your **username** and **password** found above. **Please notice the proxy option.**

Unique solution ID: #1051
