

Use SIP Trunk / VoIP Phone Service

How to config telnyx for Ecsow Dialer/Voice Broadcast

Please login your telnyx account, then click the "Real-Time Communications > Voice > SIP Trunking". Please select the "Credentials" type when you create SIP connection as the below image shows.

You can choose the default settings for other steps. It will auto create a username and password for you. You can also change it later. Please copy these information to Ecsow dialer as the below image shows. Please notice the "Domain" field should be **sip.telnyx.com** .

Unique solution ID: #1052
