How To Use Ecsow Predictive Dialer

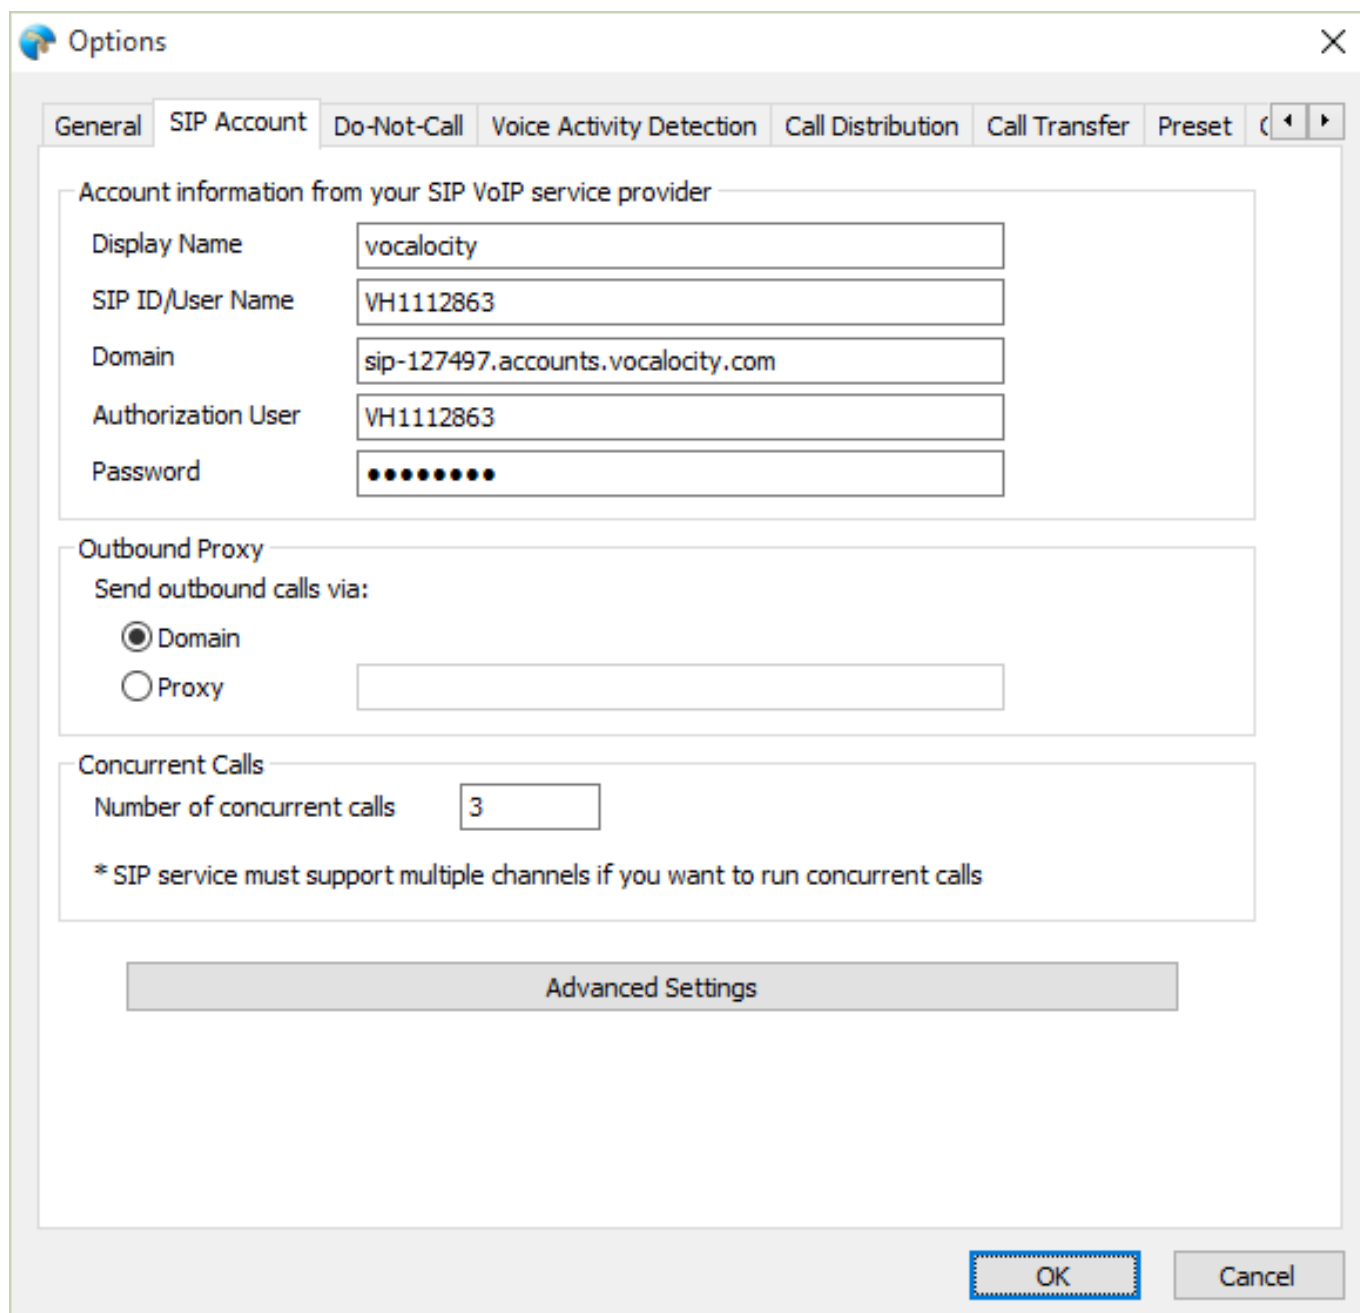

1, Installing the Predictive Dialer on a Dialing Computer

Download Ecsow Predictive Dialer software and follow on-screen instructions to install Predictive Dialer on a computer.

2, Configuring the phone service

Ecsow software can use several phone services: VOIP phone service (such as SkypeConnect, Vonage, Callcentric, any SIP trunk provider, etc); a PBX system with SIP extensions (such as Cisco, Avaya, Asterisk, etc).

Click Ecsow menu Tools > Options > SIP Account tab to input your SIP account information.

The screenshot shows the 'Options' dialog box with the 'SIP Account' tab selected. The dialog has a title bar with a globe icon and a close button. The tabs are: General, SIP Account (selected), Do-Not-Call, Voice Activity Detection, Call Distribution, Call Transfer, Preset, and a scrollable tab bar. The 'SIP Account' tab contains three sections: 'Account information from your SIP VoIP service provider' with fields for Display Name (vocalocity), SIP ID/User Name (VH1112863), Domain (sip-127497.accounts.vocalocity.com), Authorization User (VH1112863), and Password (masked with dots); 'Outbound Proxy' with a radio button for 'Domain' (selected) and a text field for 'Proxy'; and 'Concurrent Calls' with a text field for 'Number of concurrent calls' (3). A note states: '* SIP service must support multiple channels if you want to run concurrent calls'. At the bottom of the dialog is an 'Advanced Settings' button. The bottom right corner has 'OK' and 'Cancel' buttons.

How to Setup

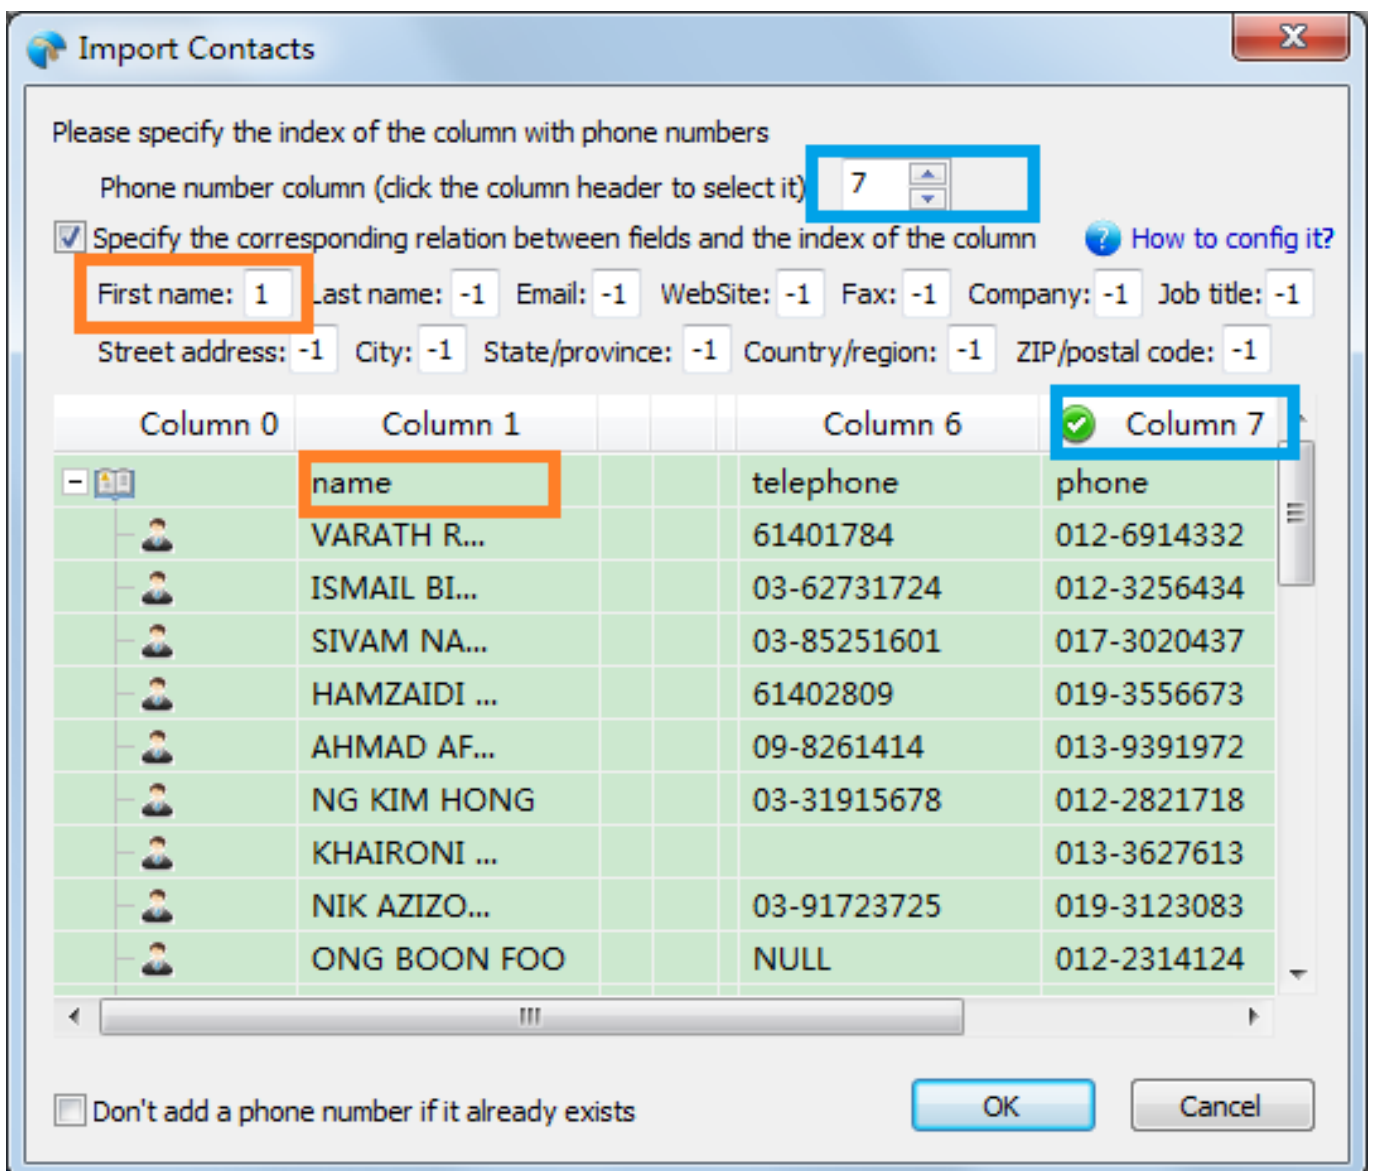

3, Import call list by click Ecsow menu Import > Import CSV File.

Click the menu Import > Import CSV file

You will need to specify which of your columns from your call list will be placed on Predictive Dialer's "Name" and "Phone Number" columns.

How to Setup

4, Click the Start Dialing button to start the predictive dialing.

Please note you need to specify 1 for US phone number, where 1 is the country code. You can set this at Ecsow menu Tools > Options > General tab.

5, Auto distribute call to agent.

Once a call is answered by a live human, the call is transferred to an available agent; on the agent's computer, an alert window (screen popup) pops up, and the agent can talk to the client right away. The screen popup contains all the information about the client. Here is what the popup window will look like:
